EasyPlat, DomoStep and MiniPocket

Platforms for low and high travel

Whether there are a few steps to overcome or a height difference up to 12 meters, AreaLift guarantees the ideal solution for every need.

AreaLift

Range of products for accessibility

DomoFlex

The DomoFlex platform lift is perfect for connecting floors both indoors and outdoors, such as lofts, penthouses, terraces, balconies and all those situations where the fixing points are limited
Maximum travel:
12 meters.

See specific catalog

EasyPlat

Our lifting platform designed for overcoming architectural barriers. Ideal for two people standing or a wheelchair user and another person.
Maximum travel: **3 meters.**

Page 6

AreaLift is the company specialized in the removal of architectural barriers, both in public or domestic premises. Our solutions have a smooth impact in your location thanks to the high designed structures and to the glass surfaces. The whole range can be installed in a few hours or in a few days depending on the needs. All the products require reduced masonry work: we take care of everything!

DomoStep

The open platform, DomoStep 100A is the ideal solution to overcome architectural barriers **up to a meter**, in total safety. Designed specifically for people with reduced mobility or wheelchairs, alone or with another person.

Page 12

MiniPocket

It is the ideal solution to overcome a few steps in all historical or architectural buildings. It offers almost no visual impact; when closed, the platform is hidden in the floor.

Page 16

EasyPlat

Lifting platform without shaft and without wall fixings

Versatile solution

EasyPlat is the lifting platform solution for all environments: your house, the block of flats where you live or all public spaces such as offices, shops or restaurants.

It guarantees full comfort and has been designed to overcome small travel like a few steps or even an entire floor in complete safety as it reaches 3 meters travel.

Why choose EasyPlat

- 🏠 Maximum level of safety
- 🏠 Take advantage of most of available space
- 🏠 Extremely silent
- 🏠 Reduced purchase and maintenance costs
- 🏠 Quick assembly time: maximum 1 day
- 🏠 Italian style, with sophisticated design, LED strips and double controls panels
- 🏠 Absolute absence of masonry works (no pit needed)
- 🏠 Minimal aesthetic impact
- 🏠 Can be installed both outdoor and indoor
- 🏠 Made in Italy: built in Parma with care and passion

Stylish for your home

EasyPlat has been designed to fit all environments including your house and your beloved spaces.
The EasyPlat **neat design offers unique details** thanks to the essential and wisely shaped profiles, upper and lower lighting with LED strips and large windows.

Simple, thanks to the absence of masonry works

EasyPlat simply stands on the floor. It has an integrated access ramp and it does not require any pit. Load-bearing walls are not required. EasyPlat only needs minimal space, it does not require a machine room or any external cabinet: **everything is fitted in the installation spaces!**

EasyPlat

Perfect for your block of flats

EasyPlat can be installed in the block of flats where you live to help everyone overcome small travels that make it difficult to move between levels.

EasyPlat is activated touching a button, both in the platform and on the arrival floor. It is equipped with **double control panels on both sides**. The column with wireless buttons can be positioned everywhere on the ground floor.

Functional in any public environment

EasyPlat is the ideal solution to overcome architectural barriers even in public environments. It will ensure easy access for everyone in schools, shops, restaurants and offices.

LED lighting, improves the design of the product and helps to visualize its overall dimensions in the dark ensuring higher safety.

Quick and easy to install

EasyPlat can be installed in a short time:
even in one day!
The main components are pre-assembled supplied to simplify and speed up the installation process.

MiniPocket

Scissor platform with combined vertical and horizontal movement

Perfectly integrated

It's the ideal solution to overcome few steps wherever special architectonic commitments are required. Its visual impact is almost insignificant since the platform is embedded in the floor when closed.

Thanks to its constructive features MiniPocket platform makes possible to use the same flooring of the installation site. Once closed, the platform becomes invisible.

Public and private use

Suitable for public and private use to overcome architectural barriers.

Outdoor installation

It can be used outdoor since all material is IP54 certified.

Accessibility

Who we are

AreaLift is a young company established by professionals with long experience in the vertical transport sector.

AreaLift is specialized in the design and production of home and platform lifts to overcome differences in height up to 12 meters.

Our products are sold in over 30 countries worldwide!

Made in Italy

What makes us unique is the Italian style and the attention to quality which comes from our history as a manufacturing company.

Functional and comfortable, AreaLift's lifting platforms allow you to move easily, in perfect autonomy and with the charm that distinguishes the Italian style.

LiftingItalia and AreaLift

The group consists of two young and dynamic companies that work in perfect synergy completing each other.

LiftingItalia - Established in 2003, is the parent company and today is specialized in the production of **high quality homelifts**.

AreaLift - Established in 2003, is a company **specialized in accessibility solutions and vertical mobility**.
